

Statute and Rules of Procedure of Task Forces of EOSC-CZ initiative

(version june 2026)

1 Preamble

The European Open Science Cloud (EOSC) is a European initiative aimed at developing a broadly understood framework supporting open science practices in the field of research data management. Open Science is understood as a tool for increasing the efficiency and quality of research and as a way to solve the multifaceted problems of contemporary society. The EOSC initiative has the ambition to comprehensively address the issue of working with research data based on the FAIR principles, according to which digital data and their metadata should be Findable, Accessible, Interoperable and Re-usable.

The implementation of the EOSC initiative in the Czech Republic ([EOSC CZ](#)) aims to support good practice in the field of research data management across scientific communities and to create a national hub for this European initiative. One of the goals is to build a National Data Infrastructure (NDI) – a comprehensive environment for sharing, managing and accessing data for research purposes with an emphasis on multidisciplinary research. The NDI includes the National Repository Platform (NRP), an infrastructure for storing and making FAIR research data available. To achieve this goal, the EOSC CZ Working Groups ([PS EOSC CZ](#)) play a critical role, bringing together experts and interested parties across research areas.

2 Definition of EOSC CZ Task Forces

Task Forces (TF) follow on from the work of the PS EOSC CZ. The TF serves as a platform for researchers and experts who work together on specifically defined topics related to the implementation of EOSC, or rather, work with FAIR research data. The operation of each TF is limited in time by the achievement of the results to which it committed itself when it was established. The initiative to establish a TF can come from any expert who identifies a problem, proposes a basic approach to its solution, and compiles a brief charter of the TF. This Statute and Rules of Procedure regulate the form and activities of the Task Forces of the EOSC initiative in the Czech Republic ([TF EOSC CZ](#)).

3 Activities of EOSC CZ Task Forces

- 3.1 As an open platform, they provide space for collaboration and active solutions to specific problems or issues related to the needs of research communities in the area of research data management.

Alternatively, the TF's activities may be terminated.
