Institutional Data Management

Charter Task Force

Charter

Last updated: 26/10/2026

Version: 1.1

Task Force Overview

Leader:

prof. RNDr. Jiří Vondrášek, CSc., IOCB CAS

Deputy:

Mgr. Marie Šafner, IOCB CAS

Solved issues:

Creation of the first systematic and community-agreed set of recommendations for institutional data management (DM) in the academic sector across CZ (ideally EU implementable). The document will serve as a "Handbook for Institutional DMs" that can show academic institutions the way from ad-hoc approaches to strategic and sustainable scientific data management.

Objectives:

- Mapping of current approaches of institutions to Data Management (strategies, policies, roles, infrastructures, processes).
- Identifying common pillars of institutionalized data management.
- Pilot verification of these findings within the BHF working group.
- Developing a set of best practices and recommendations for academic institutions.
- Comparison of strategies and approaches across working groups (especially where DM is part of wider domains).
- Creating a consistent framework for institutional DMs.

Results and outputs

Planned outputs:

- Analytical reports (survey, mapping).
- Proposal of common pillars of DM.
- DM Handbook (v1.0).
- Recommendations for further development (e.g. metadata standards, governance, roles, infrastructures, training).

Timeline and schedule

Planned duration:

12 months (October 2026 – October 2027)

Participants

Members:

coordinator, analyst, representatives of 2-3 advanced institutions, representative of the ELIXIR DM Network (or relevant DM experts), representatives of institutional libraries, IT, RDM services, data of stewards from BHF

Spolufinancováno Evropskou unií
